

FOR IMMEDIATE RELEASE

Jordan Engineering Inc. Gives Back in a Big Way

Beamsville, Ontario - June 23, 2010 - Jordan Engineering Inc. is proud to announce today that it will continue to support its local and global communities.

The spring season has been a busy one for Jordan Engineering, but has provided outstanding rewards for the company as well as for the company's commitment to local and global communities.

This past May, Jordan Engineering Inc. once again held its annual Automation Workshop. Clients and industry professionals came together for a day of presentations and discussions on a wide variety of topics relating to the automation industry. The presentations given throughout the day were provided by Schneider Electric, Wonderware Canada East, Rockwell Automation and CB Automation Inc., as well as Jordan Engineering. It was decided for the first time that \$100 from every ticket sold was to be donated to the YMCA of Niagara Strong Kids Campaign. This year's Automation Workshop was also the recipient of much sponsorship support from companies within the automation industry, with attendees and presenters donating their time and money to a great cause. The lead sponsor was Schneider Electric donating \$1000, with other sponsors including Wonderware Canada East, CB Automation Inc., Rockwell Automation, Perly Consulting Group, Gerrie Automation, Gray Matter Systems and Anixter Canada. Together these companies were able to contribute the majority of the funds needed to run a year long after school program for children in our local community.

Keeping with the trend of giving, Jordan Engineering also participated in the Ontario Society of Professional Engineers (OSPE) annual golf tournament on June 10 as a bronze level sponsor. The event was held to raise funds for the Engineers Without Borders (EWB) organization, and at the end of the night OSPE was proud to announce that they would be donating \$3000 to this great cause. EWB works with many African communities to help with their business development and is no stranger to Jordan Engineering. They are currently partnered together on a number of projects including Forest Fruits and Rent-to-Own, both of which focus on Zambian farmers.
